6th October 2017

NOTICE TO MARINERS

FIRTH OF TAY

City Quay lock entrance

This is to inform mariners of works happening to the City Quay lock gate. The gate has been leaking recently and a solution is required to ensure dock levels are maintained in City Quay. Remedial works are starting Monday 9th October. Works are expected to take 4-5 weeks to complete and will be carried out within normal working hours.

A stone mound will be created on either side of the gate which will have the effect to slow water leakage but will not impact on the natural circulation flushing in-out of the dock. This will be done by a digger on the shore.

The gate has been inoperable for some time so these works make no difference.

Over the timeframe there will also be some diving to make repairs to the gate – and permits to work will be in force.

Mariners should be aware that rock mound obstructions will thereafter be in place in front of the gates.
